TRAINING & COACHING

Sector: Telecom

Topic: Digital Transformation

Our approach:

1. Assess the AS-IS and understand pain points

2. Define the objectives of training

3. Review documentation and adapt to the context

4. ISTQB sensibilization to 60 people

5. ISTQB training & certification of 20 people.

CONTEXT

To secure its digital transformation journey, our client has needed our support to perform **a Quality Assurance & Test Assessment** on its current testing practices in order to :

- Get an overview of the strengths and improvements areas on the testing disciplines
- Identify specific and structural recommendations to structure new program
- Define the QA & Test Training Program adapted to the new operating model related to the digital transformation.

BENEFITS

- **Training Plan tailored to the context;**

- **Certification of 20 key people to support the digital transformation program;**

- **Sensibilisation of 60 people with different roles (project manager, product owner, developers, key users) to the ISTQB standard and glossary;**

- **QA & Test Culture:** coaching Test Management Office leader to grow up the QA & Testing maturity, sharing same QA referential.
